PURCHASE OF MASKS.

Commissioners Act Upon Recommen-

The District Commissioners, upon the

recommendation of Chief Engineer Robert

W. Dutton of the fire department, have

ordered the purchase of twelve Miller fire

masks for the use of the local department.

The masks are designed for use when fire-

men find it necessary to penetrate a room

or building filled with dense smoke. The

masks will be distributed among the sev-

eral companies and used only by those to be

sent into hazardous places. The masks are easily slipped on and off, it is stated, the

method of putting them on being similar to that of the ordinary base ball mask.

The Miller masks, which are in use in the fire departments of New York, Boston, Baltimore, Buffalo and other large cities,

have been tested recently in this city by

the members of truck A and engine com-

pany No. 14. It is reported that in a smoke-filled room, where one could hardly

withstand suffocation half a minute, the District firemen wearing the mask were

enabled to remain ten minutes without the slightest discomfort. The mask is mainly

of rubber, and fits closely over the entire face and ears. The eyes peer out through isinglass, while the fireman breaths through a wet sponge placed before the mouth. The

bad air is exhaled through valve outlets near the ears. The masks, it is believed, will prove invaluable for use by firemen investigating the seat of a blaze in dark

cellars filled with smoke, and in the rescue of persons threatened by suffocation. There

are many other services for which the masks will be, it is believed, of great bene-fit to the men of the department.
